

Overview

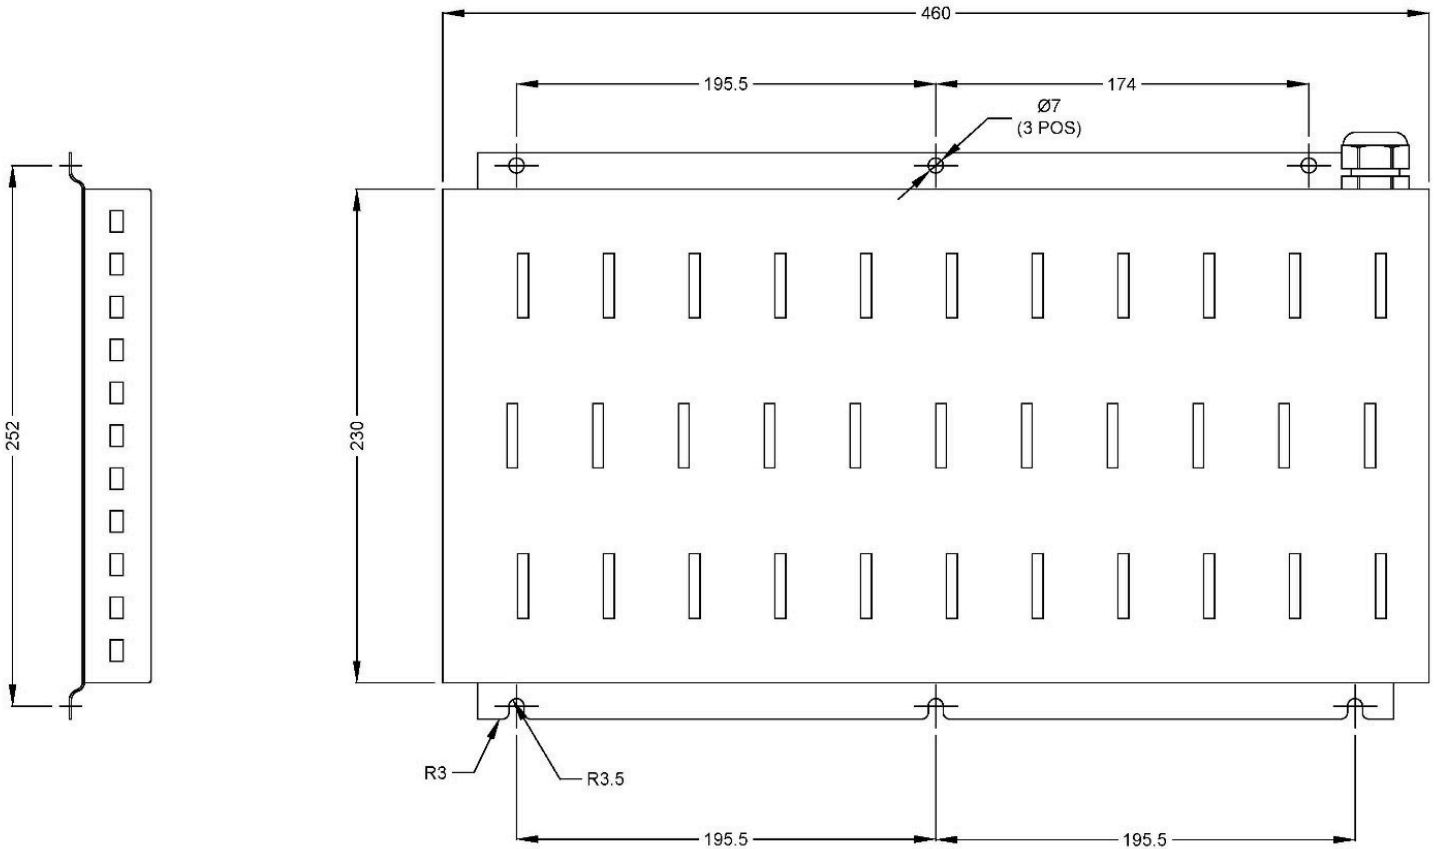

The EH04 is designed specifically for harsh, saline environments. Our enclosure incorporating a self-regulating heater, ensures optimal temperature regulation and safety in even the most challenging conditions. It is adaptable to a wide range of industrial applications with it's primary use as frost protection for equipment in enclosures.

Product Specifications

- Enclosure Material 316L Stainless Steel
- Ingress Protection: IP65
- ATEX Approved for Hazardous Areas
- Thermostat Options Available
- 200 Watt 230 Volt self-regulating heater
- 100 Watt Version Available

Dimensional Details

Technical Data

Ambient Temperature Range: -50°C to +70°C

Thermostat Switching Points (Optional) : On 4°C – Off 11°C

Hazardous Area Approved:

- Ex II 2GD
- Ex e IIC T3 Gb
- Ex tb IIIC T195°C Db IP65
